
(a)
F_y, lateral [N]
F_x, drag along spines [N]
mirrored (not tested)
(b)
F_z [N]
F_y [N]
F_x [N]
(c)
$F_y = 0$
F_z, normal [N]
F_x, drag along spines [N]
(d)
$F_x = 0$
F_z, normal [N]
F_y, lateral [N]
mirrored (not tested)
F_z just before first slip [N]
(+ tension, − compression)
Cell mean ± SD
Polynomial mean fit
Fit ± σ (residual)
Drag / lateral slip
Mirrored (symmetry)
