(a) unit: zero lateral load
held at test ceiling
unit normal limit f_n [N] (tension +)
unit rake shear s [N]
(b) unit: rake shear = 20 N
unit normal limit f_n [N] (tension +)
unit lateral load l [N]
(c) pad prediction: peeling limit
$|M_l|$ [N·m] at $F_n = F_l = 0$
pad rake shear F_t [N]
old implementation: pad F0 = 400 N
old implementation: pad F0 = 650 N
unit terminal median / IQR
one terminal trial
